The Fund

The Fund is a non-diversified, closed-end investment company whose objective is to seek long-term capital appreciation through investment in equity and equity-linked securities of Swiss companies. The Fund also may acquire and hold equity and equity-linked securities of non-Swiss companies in limited instances.

The Fund is listed on the New York Stock Exchange under the symbol "SWZ".

Net Asset Value is calculated daily by 6:15 P.M. (Eastern Time). The most recent calculation is available by accessing the Fund's website www.swzfund.com. Net Asset Value is also published weekly in *Barron's*, the Monday edition of *The Wall Street Journal* and the Sunday edition of *The New York Times*.

THE SWISS HELVETIA FUND, INC.

Dear Shareholder:

We are pleased to provide the Semi-Annual Report for The Swiss Helvetia Fund for the fiscal period ended June 30, 2014. Please note that while the management discussion and analysis and financial statements included here cover the period from January 1, 2014 – June 30, 2014, Schroder Investment Management North America Inc. (Schroders) became the Fund's investment adviser effective July 1, 2014.

We would also like to take this opportunity to thank you for the trust you have placed in Schroders. As part of a global asset management firm with over 200 years of investment experience and \$464.1 billion in assets under management as of June 30, 2014, our investment capabilities span global, developed and emerging markets. Our activities are supported by extensive in-house resources that include research teams, analysts, economists and portfolio managers – a network of more than 390 professionals throughout 34 offices in 27 countries – one of the largest office networks of any dedicated asset management company. In particular, Schroders has a long tradition in Swiss Equities, having a presence in Switzerland since 1960.

Our detailed comments regarding the Swiss economy follows in our Management Discussion and Analysis.

We look forward to the opportunity to be of service to you. Please do not hesitate to let us know if you have questions or concerns. We would encourage you to visit www.swzfund.com for daily price and performance information, fund documents as well as investment updates.

Again, we thank you for investing with us and look forward to our continued relationship.

Sincerely,

Mark A. Hemenetz, CFA
President

Management Discussion and Analysis (As of July 24, 2014)

For the six-month period ended June 30, 2014, the Swiss Helvetia Fund, Inc. (the “Fund”) rose 4.44% as measured by its share price performance. This lagged the Fund’s performance as measured by the change in value of the Fund’s net asset value (“NAV”), which increased 8.14%. The NAV increase is slightly in excess of the Swiss equity market, with its broader index, the Swiss Performance Index (“SPI”), rising 7.88% as measured in Swiss francs, or 7.93% as measure in US dollars.

Economic environment during the period under review

Global economic review

After rather weak macroeconomic data in the first quarter that were primarily due to weather-related setbacks in the United States, global economic growth picked up in the second quarter. Not surprisingly, US growth experienced the sharpest improvement. In Europe, the northern economies showed again solid growth whereas the southern European economies continued to sputter. Growth in the UK surprised on the upside. The emerging Asian countries continued to perform strongly albeit high expectations were only partly met. Initial growth numbers for Japan proved to be encouraging but might also turn out to be short-lived.

Swiss economic review

Swiss real gross domestic product (“GDP”) (published in May, 2014) grew by 0.5% (not annualized) in the first quarter of 2014. This is an advance of 2.0% against the

same quarter last year and in line with the average over the past six quarters. Once more, the Swiss economy continues to outpace the Euro area. The backbone was trade and, due to a mild Swiss winter, also investments in construction. Contrary to previous quarters, consumption was muted.

Market environment during the period under review

Global stock markets continued their uptrend in the first half of 2014. During the first three months of the year, developed market indices only registered modest gains. They lost some territory by end of January as the Crimean crisis broke out and some market participants’ dreams of a very “easy” monetary policy under the new chair of the Federal Reserve did not come true. In the second quarter, the S&P 500 Index advanced steadily, reaching several new all-time highs, which were superseded already in early July. The European large cap STOXX Europe 600 Total Return Index, which posted a new all-time high on June 6, 2014, did not fully keep pace after that date.

The Swiss stock market enjoyed a marginally higher total return than the S&P 500, as measured by the SPI. The Swiss stock market benefited from its heavyweight pharma and food sectors, as defensive industries tended to outperform within most major developed market indices. The best industry (using industry / sector classifications at the highest aggregation level) was nevertheless a cyclical industry, namely technology. All other sectors that outperformed were defensives.

Performance

The Fund's performance benefited in absolute terms from some of its top 10 positions (as of June 30, 2014), *i.e.*, *Actelion, Novartis, Roche, Nestlé, Burckhardt Compression, Lindt & Sprungli* and *Lonza*. Also some smaller stocks outside the top 10 positions were helpful for absolute performance: *Bucher Industries, Evolva, Leonteq* and *Meyer Burger*. Comparing the Fund's performance to the SPI, it can be said that the active weights of some of these top 10 holdings also did well in relative terms, *i.e.*, *Actelion, Burckhardt Compression, Lindt & Sprungli* and *Lonza*. On that basis, it was also beneficial to be underexposed to the banking stocks *UBS, Credit Suisse* and *Julius Baer*, whose share prices suffered due to the large fine paid by *Credit Suisse* in respect of a settlement with the US Department of Justice. The positions held in *Credit Suisse* and *UBS*, however, were detractors to the Fund's absolute performance. Other stocks that suffered negative performance were *Basilea, Galenica, OC Oerlikon, Panalpina, Tecan* and *Syngenta*.

Private Equity Investments

On a year to date basis, the Fund's two private equity partnership investments benefited from positive revaluations of some individual portfolio holdings, however, the directly held private equity investment in *Selfrag AG* suffered a further write-down.

Portfolio changes during the first half of 2014

The rationale for portfolio changes during the first quarter of 2014 has been explained in the quarterly report as of March 31, 2014. Schroders has taken on the responsibility as the Fund's investment adviser on July 1, 2014. Therefore we limit our report regarding portfolio changes during the first half of 2014 to the table provided elsewhere in this report, as reasons for transactions of the former advisors are outside our knowledge.

As of June 30, 2014, there are 27 listed companies held by the Fund, and six direct private equity investments plus two participations held in private equity limited partnerships.

As the Fund's newly appointed investment adviser, we plan to re-position the Fund's holdings over the next several quarters. We will report on this progress in the Fund's periodic reports.

Outlook

Global economic and monetary outlook

The global economy continues to recover in 2014, as the headwinds which have held back activity last year are expected to abate somewhat and allow demand to lift. The upturn is primarily led by the developed economies, the US and Europe, whilst the emerging economies are experiencing a more modest improvement. The latter face the more significant challenge in adjusting to the post financial crisis world. Against this

backdrop, inflation is expected to remain contained given the spare capacity in the world economy. Despite the softness of the first quarter where US GDP fell at an annual rate of 2.9%, the recent improvement in the data suggests that the US could experience a sharp rebound. However, the growth profile for the Eurozone is more subdued. Looking ahead, we see stability rather than a massive deterioration, with the global recovery providing support against weaker domestic fundamentals

Swiss economic outlook

For the Swiss economy, the expert group of the Swiss State Secretariat for Economic Affairs (SECO) lowered their GDP growth forecast from 2.2% to 2.0% for 2014 and from 2.7% to 2.6% for 2015, due to the recent weakness in exports, which are only expected to pick up with the global growth recovery. The seasonally adjusted unemployment rate, which seemed frozen at 3.2% for a year, is expected to drop below 3.0% by 2015. The revision is based on already reported weakness in the first quarter, and as Swiss companies in general, through their exports and international subsidiaries, are more dependent on global growth rather than the domestic economy, this does not cloud their outlook.

Swiss market outlook

Earnings expectations, which we considered too optimistic at the beginning of the year have been revised down. The yearly pattern that can typically be observed is such

that sell-side analysts in January over-estimated the current year's earnings growth potential, but by late spring, the necessary adjustments were made. For the Swiss market overall we expect mid to high single digit earnings per share growth. This scenario now seems realistic, given that we could see around 3.0% global real GDP growth. As equity markets have registered single digit advances year to date, valuations as measured by price/earnings ratios have risen slightly.

Our outlook for equities remains quite favorable: economic growth that results in earnings growth (both more or less at the average or trend rate) coupled with still accommodative monetary policies.

It is, however, not a time to lean back as equity investors. Firstly, risks stemming from geopolitical conflicts have risen in recent months. Secondly, now that the general perception seems to be that rates remain lower for longer, policy mistakes or miscommunications from central banks are a second potential source of worry. Thirdly, several companies have disappointed with some reporting an unexpected fall in profits. Therefore, it is essential to pick the right stocks.

THE SWISS HELVETIA FUND, INC.

Review of Operations

Trading activity for the six months ended June 30, 2014 involved changes in the following positions:

² Calculated using the average shares method.

³ Includes net realized and unrealized currency gain and losses.

⁴ The net asset value of \$16.51 differs from the net asset value reported by the Fund on June 30, 2014, \$16.69, because it reflects a distribution declared on June 4, 2014 and paid on July 24, 2014.

⁵ The net asset value for financial reporting purposes, \$15.46, differs from the net asset value reported on December 31, 2013, \$15.39, due to adjustments made in accordance with accounting principles generally accepted in the United States of America.

⁶ Total investment return based on market value differs from total investment return based on net assets value due to changes in relationship between Fund's market price and its net asset value ("NAV") per share.

⁷ Not annualized for periods less than one year.

⁸ Annualized for periods less than one year.

⁹ Reflects the expense ratio excluding any waivers and/or expense reimbursements.

See Notes to Financial Statements.

Notes to Financial Statements (Unaudited)

Note 1—Organization and Significant Accounting Policies

A. Organization

The Swiss Helvetia Fund, Inc. (the “Fund”) is registered under the Investment Company Act of 1940, as amended (the “Act”), as a non-diversified, closed-end management investment company. The Fund is organized as a corporation under the laws of the State of Delaware.

The investment objective of the Fund is to seek long-term growth of capital through investment in equity and equity-linked securities of Swiss companies. The Fund may also acquire and hold equity and equity-linked securities of non-Swiss companies in limited instances.

B. Securities Valuation

The Fund values its investments at fair value in accordance with accounting principles generally accepted in the United States (“GAAP”).

When valuing listed equity securities, the Fund uses the last sale price on the securities exchange or national securities market on which such securities primarily are traded (the “Primary Market”) prior to the calculation of the Fund’s net asset value (“NAV”). When valuing equity securities that are not listed (except privately-held companies and private equity limited partnerships) or that are listed but have not traded on a day on which the Fund calculates its NAV, the Fund uses the mean between the bid and asked prices for that day. If there are no asked quotations for such a security, the value of such security will be the most recent bid quotation on the Primary Market on that day. On any day when a security’s Primary Market is closed because of a local holiday or other scheduled closure, but the New York Stock Exchange is open, the Fund may use the prior day’s closing prices to value such security regardless of the length of the scheduled closing.

When valuing fixed-income securities, the Fund uses the last bid price prior to the calculation of the Fund’s NAV. If there is no current bid price for a fixed-income security, the value of such security will be the mean between the last quoted bid and asked prices on that day. Overnight and certain other short-term fixed-income securities with maturities of less than sixty days will be valued by the amortized cost method, unless it is determined that the amortized cost method would not represent the fair value of such security.

It is the responsibility of the Fund’s Board of Directors (the “Board”) to establish procedures to provide for the valuation of the Fund’s portfolio holdings. When valuing securities for which market quotations are not readily available, or for which the market quotations that are available are considered unreliable, the Fund determines a fair value in good faith in accordance with these procedures (a “Fair Value”). The Fund may use these procedures to establish the Fair Value of securities when, for example, a significant event occurs between the time the market closes and the time the Fund values its investments. After consideration of various factors, the Fund may value the securities at their last reported price or at some other value.

Swiss exchange-listed options, including Eurex-listed options, are valued at their most recent sale price (latest bid for long options and the latest ask for short options) on the Primary Market, or if there are no such sales, at the average of the most recent bid and asked quotations on such Primary Market, or if such quotations are not available, at the last bid quotation (in the case of purchased options) or the last asked quotation (in the case of written options). If, however, there are no such quotations, such options will be valued using the implied volatilities observed for similar options or from aggregated data as an input to a model. Options traded in the over-the-counter market are valued at the price communicated by the counterparty to the option, which typically is the price at which the counterparty would close out the transaction. Option contracts that are neither exchange-listed nor traded in the over-the-counter market are valued using implied volatilities as input into widely accepted models (e.g., Black-Scholes). The implied volatilities are obtained through several means and are cross-checked. For valuations where divergent information is received, the Fund uses the most conservative volatility (the lowest volatility in the case of long positions and the highest volatility in the case of short positions).

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (Unaudited) (continued)

The Fund is permitted to invest in investments that do not have readily available market quotations. For such investments, the Act requires the Board to determine their Fair Value. The aggregate value of these investments amounted to \$29,540,021, or 6.74% of the Fund's net assets at June 30, 2014, and are listed in Note 3 to the Schedule of Investments.

Various inputs are used to determine the value of the Fund's investments. These inputs are summarized in the three broad levels listed below:

Level 1—unadjusted quoted prices in active markets for identical assets and liabilities

Level 2—other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of June 30, 2014:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Total
Investments in Securities				
Common Stock*	\$402,964,561	\$—	\$ 5,078,942	\$408,043,503
Preferred Stock*	—	—	6,190,983	6,190,983
Private Equity Limited Partnerships	—	—	18,270,096	18,270,096
Total Investments in Securities	<u>\$402,964,561</u>	<u>\$—</u>	<u>\$29,540,021</u>	<u>\$432,504,582</u>

* Please see the Schedule of Investments for industry classifications.

Level 3 securities, which are listed in Note 3 to the Schedule of Investments, consist of the Fund's investments in privately-held companies and private equity limited partnerships that invest in privately-held companies.

Inputs and valuation techniques used by the Fund to value its Level 3 investments in privately-held companies may include the following: acquisition cost; fundamental analytical data; discounted cash flow analysis; nature and duration of restrictions on disposition of the investment; public trading of similar securities of similar issuers; economic outlook and condition of the industry in which the issuer participates; financial condition of the issuer; and the issuer's prospects, including any recent or potential management or capital structure changes. At June 30, 2014, the common shares and preferred shares, series B of NovImmune SA, a privately-held company, were valued based on a market approach using the most recent observable round of financing. Although these valuation inputs may be observable in the marketplace as is characteristic of Level 2 investments, the privately-held companies, categorized as Level 3 investments, generally are highly illiquid in terms of resale.

The Fund values its Level 3 investments in the two private equity limited partnerships in accordance with Accounting Standards Codification 820-10-35, "Investments in Certain Entities that Calculate Net Asset Value Per Share (Or its Equivalent)" ("ASC 820-10-35"). ASC 820-10-35 permits a reporting entity to measure the fair value of an investment that does not have a readily determinable fair value, based on the NAV of the investment as a practical expedient, without further adjustment, unless it is probable that the investment will be sold at a value significantly different than the NAV. If the NAV of the investment is not as of the Fund's measurement date, then the NAV should be adjusted to reflect any significant events that may change the valuation. Inputs and valuation techniques for these adjustments may include fair valuations of the partnerships and their portfolio holdings provided by the partnerships' general partners or managers, other available information about the partnerships' portfolio holdings, values

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (Unaudited) (continued)

obtained on redemption from other limited partners, discussions with the partnerships' general partners or managers and/or other limited partners and comparisons of previously-obtained estimates to the partnerships' audited financial statements. In using the unadjusted NAV as a practical expedient, certain attributes of the investment that may impact its fair value are not considered. Attributes of those investments include the investment strategies of the privately-held companies and may also include, but are not limited to, restrictions on the investor's ability to redeem its investments at the measurement date and any unfunded commitments.

When valuing Level 3 investments, management also may consider potential events that could have a material impact on the operations of a privately-held company or private equity limited partnership. Not all of these factors may be considered or available, and other relevant factors may be considered on an investment-by-investment basis. The table below summarizes the techniques and unobservable inputs for the valuation of Level 3 investments.

Quantitative Information about certain Level 3 Fair Value Measurements

	Fair Value at June 30, 2014	Valuation Technique	Unobservable inputs	Range ¹
Privately-held companies Medical Technology ²	\$4,179,181	Discounted cash flow	Weighted average cost of capital Expected compound annual growth rate of revenue (10 years)	12.4%-15% 27%-47%
Privately-held companies Biotechnology ³	\$4,733,308	Market approach	Recent round of financing	N/A
Privately-held companies Biotechnology ⁴	\$1,295,615	Discounted cash flow	Weighted average cost of capital Success rate on research and development	16% 40%
Privately-held companies Industrial Goods & Services ⁵	\$1,061,821	Discounted cash flow	Weighted average cost of capital Success rate on research and development Expected compound annual growth rate of revenue (10 years)	12%-25% 10%-70%* 28%
Private Equity Limited Partnerships Biotechnology Venture	\$3,032,697	NAV as a practical expedient	N/A	N/A
Private Equity Limited Partnerships Industrial Buy-Out	\$15,237,399	NAV as a practical expedient	N/A	N/A
Total	\$29,540,021			

¹ Significant changes in any of these ranges would result in a significantly higher or lower fair value measurement. Generally, a change in the success rate on research and development or the expected long-term 10-year revenue growth rate is accompanied by a directionally similar change in fair value. Conversely, a change in the weighted average cost of capital is accompanied by a directionally opposite change in fair value.

² Eyesense AG—Preferred Shares, Kuros Biosurgery AG—Common Shares, Spineart SA—Common Shares were valued based on this technique.

³ NovImmune SA Common Shares and Preferred Shares were valued based on this technique.

⁴ Ixodes Preferred shares were valued based on this technique.

⁵ SelfFrag AG—Preferred Shares were valued based on this technique.

* The inputs range corresponds to different stages of the company's development. The weighted average success rate is 35%.

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (Unaudited) (continued)

The Fund's policy is to disclose transfers between Levels based on their market prices at the reporting period end. There were no transfers between Levels for the six months ended June 30, 2014.

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value.

	Common Stock	Preferred Stock	Private Equity Limited Partnerships	Total
Balance as of December 31, 2013	\$5,064,380	\$6,050,106	\$18,151,971	\$29,266,457
Change in Unrealized Appreciation/Depreciation*	14,562	46,743	(37,412)	23,893
Net Realized Gain (Loss)	—	—	—	—
Gross Purchases	—	94,134	155,537	249,671
Gross Sales	—	—	—	—
Balance as of June 30, 2014	<u>\$5,078,942</u>	<u>\$6,190,983</u>	<u>\$18,270,096</u>	<u>\$29,540,021</u>

* The noted amounts of change in unrealized appreciation/depreciation relate to the fair value of Level 3 assets held on June 30, 2014.

C. Securities Transactions and Investment Income

Securities transactions are recorded on the trade date. Realized gains and losses are determined by comparing the proceeds of a sale or the cost of a purchase to a specific offsetting transaction.

Dividend income, net of any foreign taxes withheld, is recorded on the ex-dividend date. Interest income, including amortization of premium and accretion of discount, is accrued daily. Estimated expenses are also accrued daily.

The Fund records Swiss withholding tax as a reduction of dividend income, net of any amount reclaimable from Swiss tax authorities in accordance with the tax treaty between the United States and Switzerland.

D. Distributions

The Fund pays dividends at least annually to the extent that it has any federally taxable net investment income and makes distributions of any net realized capital gains to the extent that they exceed any capital loss carryforwards. The Fund determines the size and nature of these distributions in accordance with provisions of the Internal Revenue Code of 1986, as amended (the "Code"). Distributions may be paid either in cash or in stock with an option to take cash. The Fund records dividends and distributions on the ex-dividend date.

E. Federal Income Taxes

The Fund's policy is to continue to comply with the requirements of the Code that are applicable to regulated investment companies and to distribute all its taxable income to its stockholders. Therefore, no federal income tax provision is required.

Income and capital gain distributions are determined in accordance with federal income tax regulations, which may differ from GAAP. See Note 5 for federal income tax treatment of foreign currency gains/losses.

Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years and has concluded that no provision for federal income tax is required in the Fund's financial statements. The Fund files federal tax returns which remain open for examination generally for the current year and the three prior years. In addition, the Fund holds investments in Switzerland and other foreign tax jurisdictions. Withholding taxes on foreign interest and dividends have been provided for in accordance with each applicable country's tax rules and rates.

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (Unaudited) (continued)

F. Foreign Currency Translation

The Fund maintains its accounting records in U.S. dollars. The Fund's assets are invested primarily in Swiss equities. In addition, the Fund can make its temporary investments in Swiss franc-denominated bank deposits, short-term debt securities and money market instruments. Substantially all income received by the Fund is in Swiss francs. The Fund's NAV, however, is reported, and distributions from the Fund are made, in U.S. dollars, resulting in gain or loss from currency conversions in the ordinary course of business. Historically, the Fund has not entered into transactions designed to reduce currency risk and does not intend to do so in the future. The cost basis of foreign denominated assets and liabilities is determined on the date that they are first recorded within the Fund and translated to U.S. dollars. These assets and liabilities are subsequently valued each day at prevailing exchange rates. The difference between the original cost and current value denominated in U.S. dollars is recorded as unrealized foreign currency gain/loss. In valuing securities transactions, the receipt of income and the payment of expenses, the Fund uses the prevailing exchange rate on the transaction date.

Net realized and unrealized gains and losses on foreign currency shown in the Fund's financial statements result from the sale of foreign currencies, from currency gains or losses realized between the trade and settlement dates of securities transactions, and from the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid.

When calculating realized and unrealized gains or losses on equity investments, the Fund does not separate the gain or loss attributable to changes in the foreign currency price of the security from the gain or loss attributable to the change in the U.S. dollar value of the foreign currency. Other foreign currency translations resulting in realized and unrealized gain or loss are disclosed separately.

G. Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

H. Concentration of Market Risk

The Fund primarily invests in securities of Swiss issuers. Such investments may carry certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include future political and economic developments, unfavorable movements in the U.S. dollar relative to the Swiss franc, and the possible imposition of exchange controls and changes in governmental law and restrictions. In addition, concentrations of investments in securities of issuers located in a specific region expose the Fund to the economic and government policies of that region and may increase risk compared to a fund whose investments are more diversified.

Note 2—Fees and Transactions with Affiliates

Through June 30, 2014, the period covered by this report, Hottinger Capital Corp. ("HCC"), which is wholly-owned by Banque Hottinger & Cie SA, served as the Fund's investment adviser. The Fund's investment advisory agreement with HCC terminated, in accordance with its terms, on June 30, 2014. Under that agreement, the Fund paid HCC an annual advisory fee based on its month-end net assets which accrued daily and was calculated and paid monthly at the following annual rates: 1.00% of the first \$60 million, 0.90% of the next \$40 million, 0.80% of the next \$100 million, 0.70% of the next \$100 million, 0.65% of the next \$100 million, 0.60% of the next \$100 million, 0.55% of the next \$100 million, 0.50% of next \$200 million and 0.45% of such assets in excess of \$800 million. Effective July 1, 2014, Schroder Investment Management North America Inc. and its affiliate, Schroder Investment Management North America Limited, commenced serving as the Fund's investment adviser and investment sub-adviser, respectively, as described in Note 9.

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (Unaudited) (continued)

During the period covered by this report, the Fund and HCC had agreed to share equally certain common expenses subject to review by the Audit Committee of the Board. During the six months ended June 30, 2014, \$3,500 of expenses incurred in connection with publicizing the Fund were shared equally by the Fund and HCC. Certain persons who served as officers and Directors of the Fund during the period covered by this report also served as officers or directors of HCC and Banque Hottinger & Cie SA. These persons were not paid by the Fund for serving in these capacities.

Note 3—Other Service Providers

Citi Fund Services Ohio, Inc. (“Citi” or the “Administrator”) provides certain administration and portfolio accounting services to the Fund, American Stock Transfer & Trust Company is the Fund’s transfer agent, and Citibank, N.A. serves as the Fund’s custodian. The Fund pays these service providers’ fees, which are accrued daily and paid monthly.

Note 4—Capital Share Transactions

The Fund is authorized to issue up to 50 million shares of capital stock. HCC owned 98,699 of the 26,557,389 shares outstanding on June 30, 2014. Transactions in capital shares were as follows:

	For the Six Months Ended June 30, 2014		For the Year Ended December 31, 2013	
	Shares	Amount	Shares	Amount
Dividends Reinvested	607,001	\$ 8,595,130	—	\$ —
Repurchased from Buyback	—	—	(439,377)	(5,566,067)
Repurchased from Tenders	(4,579,480)	(68,371,636)	—	—
Net Increase (Decrease)	<u>(3,972,479)</u>	<u>\$(59,776,506)</u>	<u>(439,377)</u>	<u>\$(5,566,067)</u>

Note 5—Federal Income Tax and Investment Transactions

Reclassifications are made to the Fund’s capital accounts to reflect income and gains available for distribution (or available capital loss carryforward) under income tax regulations. The tax character of distributions paid during the year and the tax components of net assets will be updated at the Fund’s fiscal year-end.

The tax character of distributions paid during 2013 was as follows:

Ordinary Income	\$ 6,686,721
Short-Term Capital Gains	4,575,027
Long-Term Capital Gains	26,570,715
Total	<u>\$37,832,463</u>

Under current tax law, capital losses realized after October 31 of the Fund’s fiscal year may be deferred and treated as occurring on the first business day of the following fiscal year. At December 31, 2013, the Fund had no deferred post-October 2013 capital and currency losses.

Capital loss carryovers retain their character as either long-term capital losses or short-term capital losses and are applied as a new loss on the first day of the immediately succeeding tax year. At December 31, 2013, the Fund had no capital loss carryovers.

At December 31, 2013, the components of distributable earnings on a tax basis were as follows:

Undistributed Ordinary Income	\$ 4,818,279
Unrealized Appreciation	189,226,685
Total	<u>\$194,044,964</u>

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (Unaudited) (continued)

Gains and losses from foreign currency transactions are treated as ordinary income and loss, respectively, for federal income tax purposes.

The aggregate cost of purchases and proceeds from sales of investments, other than short-term obligations, for the six months ended June 30, 2014 was \$117,879,725 and \$188,729,756, respectively.

Note 6—Stock Repurchase Program

Pursuant to authorization by the Board, the Fund began open market purchases of its common stock on the New York Stock Exchange in 1999. The Board has authorized a stock repurchase program permitting such purchases by the Fund in each subsequent year, except that no such program has been approved for 2014. The principal purpose of the stock repurchase program has been to enhance stockholder value by increasing the Fund's NAV per share without adversely affecting the Fund's expense ratio.

The Fund intends to repurchase shares of its common stock in the future, at such times and in such amounts as is deemed advisable and in accordance with applicable law, subject to various factors, including the limitations imposed by the federal securities laws governing the repurchase of an issuer's stock by the issuer and the ability of the Fund to raise cash to repurchase shares of the Fund's common stock in a tax-efficient manner.

Note 7—Tender Offers

On December 3, 2013, the Fund announced a one-time tender offer program (the "Program"), which was approved by the Fund's Board. Commencing on January 10, 2014, the Fund conducted a tender offer (the "Offer") to its stockholders in accordance with the Program. Pursuant to the Offer, the Fund offered to purchase up to 15% of its issued and outstanding shares of common stock at a price equal to 95% of its NAV per share, as determined by the Fund on February 12, 2014. The Offer terminated on February 11, 2014.

Approximately 19,260,691 shares of the Fund's common stock, or approximately 63% of the Fund's issued and outstanding common stock, were tendered in the Offer. As a result, the Offer was oversubscribed and, pursuant to the terms of the Offer, not all of the shares that were tendered were accepted for payment by the Fund. Under the final proration calculation, approximately 23.8% of the Fund's shares that were tendered were accepted for payment. The Fund repurchased and retired 4,579,480 shares at a price of \$14.93 per share, resulting in an aggregate repurchase price of \$68,371,636. This difference between the Fund's NAV and the repurchase price resulted in a gain to the Fund of \$1,511,228, or a \$0.05 increase to the Fund's NAV per share.

Note 8—Capital Commitments

As of June 30, 2014, the Fund maintains illiquid investments in two private equity limited partnerships. These investments appear in the Fund's Schedule of Investments. The Fund's capital commitments for these partnerships are shown in the table below:

Investments	Original Capital Commitment*	Unfunded Commitment*	Fair Value as of June 30, 2014
Private Equity Limited Partnerships—International (a)			
Aravis Biotech II, Limited Partnership	\$ 3,664,862	\$441,253	\$ 3,032,697
Zurmont Madison Private Equity, Limited Partnership	15,787,100	569,785	15,237,399

* The original capital commitment represents 3,250,000 and 14,000,000 Swiss francs for Aravis Biotech II, LP and Zurmont Madison Private Equity LP, respectively. The unfunded commitment represents 391,303 and 505,285 Swiss francs, respectively. The Swiss franc (CHF)/U.S. dollar exchange rate as of June 30, 2014 was used for conversion and equals 0.8868.

(a) This category consists of two private equity limited partnerships that invest primarily in ventures, biotechnology and in management buyout of industrial and consumer goods companies. There is no redemption right for the interests in these two limited partnerships. Instead, the nature of the investments in this category is that distributions are received through the realization of the underlying assets of the limited partnership.

THE SWISS HELVETIA FUND, INC.

Notes to Financial Statements (Unaudited) (concluded)

Note 9—Subsequent Events

Management has evaluated subsequent events through the date these financial statements were issued. Based on the evaluation, no additional disclosures or adjustments were required to the financial statements as of June 30, 2014 except as follows:

At the Fund's 2014 Annual Meeting of Stockholders held on June 27, 2014, the Fund's stockholders approved Schroder Investment Management North America Inc. ("SIMNA") and its affiliate, Schroder Investment Management North America Limited ("SIMNA Ltd" and together with SIMNA, "Schroders"), to serve as the Fund's investment adviser and investment sub-adviser, respectively. Schroders commenced providing advisory services to the Fund on July 1, 2014. The Fund pays SIMNA an annual advisory fee of 0.70% of the Fund's average month-end net assets up to \$250 million, 0.60% of such assets in excess of \$250 million and up to \$350 million, 0.55% of such assets in excess of \$350 million and up to \$450 million, 0.50% of such assets in excess of \$450 million and up to \$550 million, and 0.45% of such assets in excess of \$550 million. As compensation for its investment sub-advisory services, SIMNA Ltd receives 40% of the advisory fee paid by the Fund to SIMNA.

Additional Information (Unaudited)

This report is sent to the stockholders of the Fund for their information. It is not a prospectus, circular or representation intended for use in the purchase or sale of shares of the Fund or of any securities mentioned in this report.

Advisory Agreement Approval

At a meeting held on March 27, 2014, all of the members of the Fund's Board of Directors who are not "interested persons" (as defined in the 1940 Act), constituting a majority of the Fund's Board of Directors, voted to approve and recommend to stockholders for their approval (a) an Investment Advisory Agreement between the Fund and Schroder Investment Management North America Inc. ("SIMNA") and (b) a sub-advisory agreement between SIMNA and Schroder Investment Management North America Limited ("SIMNA Ltd"). For purposes of this discussion, we refer to Directors who are not "interested persons" of the Fund as "Non-Interested Directors," to the agreement with SIMNA as the "Agreement," to the agreement between SIMNA and SIMNA Ltd as the "Sub-Advisory Agreement" and to the Agreement and the Sub-Advisory Agreement as the "Agreements." We also refer to the combination of SIMNA and SIMNA Ltd, including the Switzerland-based Swiss equities team that manage the Fund as "Schroders." The Agreements became effective July 1, 2014 after approval by the Fund's stockholders at the Fund's annual meeting of stockholders on June 27, 2014. The background to this action by the Directors is set forth in the Fund's proxy statement, dated May 2, 2014, for the Fund's 2014 annual meeting of stockholders. Prior to approving the Agreements, the Directors considered the factors, and reached the conclusions, discussed below.

Factors Considered by the Non-Interested Directors in Approving the Agreements

In making their selection of Schroders to be the Fund's investment manager, subject to stockholder approval, the Non-Interested Directors considered all factors that they considered relevant, including the specific factors described below. The Non-Interested Directors did not identify any one factor as all-important or controlling, and each Director attributed different weights to the various factors.

Extent and Quality of the Services to be provided by Schroders. The Non-Interested Directors considered various data and information regarding the nature, extent and quality of services to be provided under the Agreements, including responses by Schroders to detailed requests submitted by a consultant and counsel to the Non-Interested Directors on behalf of the Non-Interested Directors and an in-person presentation by Schroders. These responses and presentation included, among other things, information about the background and experience of senior management and investment personnel who would be responsible for managing the Fund. The Non-Interested Directors considered the information provided regarding the portfolio managers and other resources that would be dedicated to the Fund and the investment philosophy and process that would be followed by those individuals in managing the Fund. Additionally, the Non-Interested Directors considered the recommendation of a consultant.

The Non-Interested Directors noted that SIMNA and SIMNA Ltd are each wholly owned subsidiaries of Schroders plc, a global asset management company listed on the London Stock Exchange with \$435.4 billion under management as of December 31, 2013. More specifically, the Non-Interested Directors considered that Schroders and their affiliates manage more than

Additional Information (Unaudited) (continued)

\$54 billion for North American clients across a range of asset classes, with assets under management of \$3 billion across 13 SEC registered mutual funds and more than \$22 billion across 19 sub-advisory portfolios. The Non-Interested Directors considered the investment expertise of Schroders and its affiliates and their commitment to the Swiss market since the 1960s and noted that the Switzerland-based Swiss equity team manages four pooled investment funds, as well as several segregated client mandates, that focus on Swiss equities, with dedicated Swiss equities under management by that team of \$1.3 billion at December 31, 2013. The Non-Interested Directors reviewed the nature, extent and quality of the management services proposed to be provided by Schroders and in connection therewith received a presentation from Schroders detailing the scope of its operations, the breadth and depth of its management, investment and research personnel and the various support and administrative services that Schroders would provide to the Fund. The Non-Interested Directors considered, in particular, the disciplined investment approach described by Schroders' dedicated Switzerland-based portfolio managers and the experience and success of other pooled investment funds it manages that are focused on Swiss equities. They also considered Schroders' strategy to exploit inefficiencies in the market through an investment approach that is fundamental, bottom-up and judgmental. Rather than seeking optimized exposure to certain factors, Schroders examines each investment opportunity on its own merits and its contribution to the overall risk/return characteristics of the entire portfolio.

The Non-Interested Directors noted that although SIMNA manages a family of SEC registered mutual funds in the United States and a number of private funds in the United States, it has not advised a 1940 Act-registered closed-end

fund or any investment company listed on a U.S. securities exchange, such as the Fund, since 1998. The Non-Interested Directors also considered Schroders' proven distribution capabilities in the United States. The total net assets of SIMNA's SEC registered mutual funds increased by 62% during 2013. In particular, the Non-Interested Directors noted Schroders' commitment to develop and implement a proactive stockholder relationship strategy that would include the development of marketing material and public and investor relations activities. The Non-Interested Directors also noted Schroders' commitment to proactively monitor investor sentiment through industry conferences, digital communications and shareholder meetings and with respect to the Fund's discount, if any, at which the Fund's shares of common stock trade on the NYSE relative to the Fund's net asset value per share. The Non-Interested Directors informed Schroders that the Fund previously announced to stockholders the Non-Interested Directors continue to assess additional actions to enhance stockholder value and to continue to monitor the discount at which the Fund's shares trade.

The Board further noted that Schroders had agreed to provide highly qualified senior executives to serve as the Fund's President and Chief Executive Officer ("CEO") and the Fund's Chief Financial Officer ("CFO") and, in that capacity, certify certain Fund reports as required by the Sarbanes-Oxley Act of 2002, and to serve as the Fund's Chief Compliance Officer ("CCO"). Schroders proposed that Mark A. Hemenetz, Chief Operating Officer for SIMNA, would serve as the Fund's President and CEO, Alan M. Mandel, Head of Fund Administration for SIMNA, would serve as the Fund's CFO and Stephen M. DeTore, Chief Compliance Officer for SIMNA, would serve as the Fund's CCO.

THE SWISS HELVETIA FUND, INC.

Additional Information (Unaudited) (continued)

Performance, Fees and Expenses of the Fund and Comparisons to Other Clients. The Non-Interested Directors noted that Schroders was not yet providing services to the Fund; therefore, there were limitations on the Non-Interested Directors' ability to evaluate the performance of Schroders in managing the Fund. Based, however, on the performance of the proposed portfolio management team in managing other Swiss equity products, the Non-Interested Directors concluded that, while recognizing that past investment performance may not be indicative of future returns, there was reason to believe that Schroders could achieve above-average performance over the long-term in managing the Fund.

In particular, the Non-Interested Directors considered the performance of the proposed Swiss equities team in managing pooled investment funds that invest in Swiss equities relative to their benchmark, the Swiss Performance Index (the "SPI"). The track record of the proposed team, comprised of Stefan Frischknecht, Daniel Lenz and other investment specialists, dates back to January 1, 1999, the date when the proposed team head took over the fund management responsibility of the Luxembourg-domiciled Schroder International Selection Fund Swiss Equity fund (the "Schroder Fund"), although Schroders advised that the inception date of some share classes of the Schroder Fund was December 18, 1995. The share class of the Schroder Fund with the most comparable management fee rate (0.75% per year) outperformed the SPI on a cumulative basis, with cumulative outperformance reaching 29.5% from January 1, 1999 until December 31, 2013. In comparison, the Non-Interested Directors noted that HCC had previously reported to them that under HCC's management the Fund had underperformed the SPI on a cumulative basis from December 31, 1997 through April 30, 2013. In reviewing this and other performance information, the Non-Interested Directors noted that although

Schroders advised that these pooled investment funds have investment mandates comparable to the Fund and are managed in a generally similar manner, and by the same Switzerland-based team that Schroders would draw on to manage the Fund, these pooled investment funds are subject to different regulatory and tax requirements than the Fund. The following table sets forth the cumulative returns (in Swiss Francs and US Dollars) of the most comparable share class of the Schroder Fund (the C distribution share class), the total return share price of the Fund and the total return of the Fund based on net asset value ("NAV"), as well as cumulative returns of the SPI, over the period indicated.

From January 1, 1999 to December 31, 2013	CHF cumulative return	USD cumulative return
Total Return Schroder International Selection Fund Swiss Equity (the C distribution share class)	103.8%	215.1%
Total Return, Swiss Helvetia Fund (share price)	63.3%	150.2%
Total Return, Swiss Helvetia Fund (NAV)	49.7%	130.7%
SPI	74.3%	171.8%

The Non-Interested Directors acknowledged that the Fund is not managed against any benchmark, including the SPI, but agreed that such comparative information was useful in assessing Schroders' ability to manage similar Swiss equity portfolios.

The Non-Interested Directors further noted the pro forma nature of the profitability information presented and that it was not possible to predict with certainty how Schroders' profitability actually would be affected by becoming the investment adviser and sub-adviser to the

Additional Information (Unaudited) (continued)

Fund but that they had been satisfied, based on their review of the projected profitability, that the profitability from its relationship with the Fund would not be excessive.

The Non-Interested Directors also noted that they would have opportunities to review Schroders' profitability in the future based on actual results.

Furthermore, the Non-Interested Directors received and considered information about the financial viability of Schroders and were satisfied that Schroders has adequate resources to perform the services required under the Proposed Agreements.

The Non-Interested Directors noted that the fee to be paid to SIMNA under the Agreement was less than fee paid to Hottinger Capital Corporation, the Fund's prior investment adviser ("HCC"), and that the fee payable to SIMNA Ltd would be paid out of the fee paid by the Fund to SIMNA (and not by the Fund). The Non-Interested Directors also noted that other expenses of the Fund were not expected to increase as a result of the retention of Schroders. The Non-Interested Directors considered the fee that SIMNA would pay to SIMNA Ltd and determined that it appears to be a reasonable sharing of the advisory fee payable by the Fund in light of the proposed allocation of responsibilities between SIMNA and SIMNA Ltd. With respect to the pooled investment funds managed by the proposed team against the SPI and with investment restrictions similar to the Fund, the Non-Interested Directors noted the management fee for those funds (in share classes that deduct a management fee) is higher than the management fee Schroders has proposed for the Fund.

Economies of Scale. The Non-Interested Directors considered that the Fund is a closed-end

fund and that it was not expected to have meaningful asset growth absent primarily a rights offering or an acquisition. They did not view the potential for realization of economies of scale as the Fund's assets grow to be a meaningful factor in their deliberations. The Non-Interested Directors noted, however, that the advisory fee rate schedule under the Proposed Agreement contains multiple breakpoints commencing with assets of U.S. \$250 million and above and that the breakpoints would immediately benefit stockholders.

Other Benefits of the Proposed Relationship. The Non-Interested Directors also considered information regarding potential "fall-out" or ancillary benefits that Schroders would receive as a result of its relationship with the Fund. While Schroders represented that it does not participate in traditional soft dollar programs for funds managed in Europe, it does use the mechanism of unbundling and commission sharing to pay for certain services that it believes benefit its clients, subject to its duty to seek best execution. The Non-Interested Directors also recognized that Schroders may derive reputational benefits from its association with the Fund, which are difficult to quantify.

Resources of Schroders. The Board noted that Schroders appeared to have the financial resources necessary to fulfill its obligations under the Proposed Agreements.

After considering all factors that they considered relevant, including the depth and continuity of the proposed Switzerland-based portfolio management team, the financial strength and stability of Schroders, the administrative expertise of Schroders and the other specific factors described above, the Non-Interested Directors, voting in person and constituting a majority of the Board, unanimously approved the Proposed Agreements as in the best interests of the Fund and its stockholders.

THE SWISS HELVETIA FUND, INC.

Additional Information (Unaudited) (continued)

Further Considerations of the Non-Interested Directors

The Non-Interested Directors met telephonically on April 17, 2014 with counsel to the Non-Interested Directors and counsel to the Fund to consider a proposal by HCC to lower the advisory fee paid by the Fund and other relevant matters. The Non-Interested Directors considered the reasons that led them to initiate the process to identify a potential successor to HCC, which included, among other things, regulatory, management and other developments involving HCC's parent that could affect the ownership and structure of HCC's parent and management of the Fund. The Non-Interested Directors noted that these reasons had been raised during the March presentation by HCC and its parent and that the HCC Letter did not provide any new information with respect to those reasons.

The Non-Interested Directors also discussed questions raised by HCC with respect to the performance of the Schroder Fund relative to the performance of the Fund and supplemental comparative data provided by Schroders to address the questions raised by HCC. The following table provided by Schroders (based on Bloomberg data) sets forth the cumulative returns (in Swiss francs) of the most comparable share class of the Schroder Fund (the C distribution share class), the total return share price of the Fund and the out-performance of the Schroder Fund relative to the Fund, over the 3-, 5-, 10- and 15-year periods ended December 31, 2013. In reviewing this performance information, the Non-Interested Directors noted that the pooled investment funds advised by the proposed portfolio management team, including the Schroder Fund, are subject to different regulatory and tax requirements than the Fund, and that performance alone is only one factor to consider in approving an investment adviser.

	3-Year	5-Year	10-Year	15-Year
Total Return, Schroder International Selection Fund Swiss Equity (the C distribution share class)	30.2%	67.2%	73.9%	103.8%
Total Return, Swiss Helvetia Fund (share price)	26.4%	32.0%	62.9%	63.3%
Cumulative performance difference (<i>Schroder Fund over the Fund</i>)	3.8%	35.2%	11.0%	40.5%

The Non-Interested Directors also considered other factors they deemed relevant, including those factors that were considered throughout their prior deliberations, such as the other perceived strengths of Schroders relative to HCC.

The Non-Interested Directors noted that the process they had followed in retaining an investment management consultant and inviting proposals from a number of qualified investment advisers had resulted in a significant potential reduction in Fund's annual advisory fee rate and that the incremental savings from the fee rate proposed by HCC were small relative to the savings to stockholders independently proposed by Schroders. The Non-Interested Directors also noted that a proposed fee rate is only one factor to consider in approving an investment adviser.

Following their discussion, the Non-Interested Directors concluded that recommending the Agreements to stockholders continued to be in the best interests of the Fund and its stockholders and reaffirmed their unanimous decision on March 27, 2014 to approve the Agreements.

THE SWISS HELVETIA FUND, INC.

Additional Information (Unaudited) (continued)

Results of Annual Meeting of Stockholders

As of April 30, 2014, the record date for the Fund's 2014 Annual Meeting of Stockholders held on June 27, 2014 (the "Meeting"), there were 26,557,389 shares of the Fund's common stock eligible to vote. At the Meeting, a quorum was present in person or by proxy and the Fund's shares were voted on the Proposals presented to the Fund's stockholders as follows:

1. To elect three Class II Directors to serve for a three year term until the 2017 Annual Meeting of Stockholders:

	<u>For</u>	<u>Withhold Authority</u>
Richard Brealey	21,843,522	2,225,987
Claus Helbig	21,941,266	2,128,243
Samuel B. Witt, III, Esq.	21,836,327	2,233,182

2. A. To approve the proposed Investment Advisory Agreement between the Fund and Schroder Investment Management North America Inc. ("SIMNA"):

<u>For</u>	<u>Against</u>	<u>Abstain</u>
17,957,796	865,583	258,935

2. B. To approve the proposed Sub-Advisory Agreement between SIMNA and Schroder Investment Management North America Limited:

<u>For</u>	<u>Against</u>	<u>Abstain</u>
17,959,864	857,524	264,923

Each Proposal received sufficient stockholder votes and was approved.

Proxy Voting Information

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available, without charge and upon request, by calling (800) 730-2932 and on the SEC's website at <http://www.sec.gov>. The Fund's proxy voting record for the twelve-month period ended June 30 is available, without charge and upon request, by calling (800) 730-2932 and on the SEC's website at <http://www.sec.gov>.

Availability of Quarterly Portfolio Schedules

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Form N-Q is available, without charge and upon request, on the SEC's website at <http://www.sec.gov> or may be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330.

Changes in Independent Registered Public Accounting Firm

On June 3, 2014, the Board of the Fund approved the dismissal of Deloitte & Touche LLP ("Deloitte") as the Fund's independent registered public accounting firm in the event Schroders commenced providing investment advisory services to the Fund. The Board's decision to approve the contingent dismissal of Deloitte was recommended by the Audit Committee of the Board after receipt of a letter from Deloitte to the Audit Committee disclosing the existence of certain business relationships and the provision of certain services to Schroders and/or its affiliates that would be considered independence impairing to the Fund under the independence rules of the

Additional Information (Unaudited) (concluded)

SEC and the Public Company Accounting Oversight Board. Deloitte stated that in the event that the Fund's stockholders voted to approve the election of Schroders, Deloitte could not continue to serve as the Fund's independent registered public accounting firm from the date Schroders commenced providing advisory services to the Fund. As a result, Deloitte was dismissed as the Fund's independent registered public accounting firm effective July 1, 2014.

Deloitte served as the Fund's independent registered public accounting firm for the fiscal years ended December 31, 2012 and December 31, 2013. The audit reports of Deloitte on the Fund's financial statements as of and for the years ended December 31, 2012 and December 31, 2013 did not contain an adverse opinion or disclaimer of opinion and were not qualified or modified as to uncertainty, audit scope or accounting principles.

During the fiscal years ended December 31, 2012 and December 31, 2013 and through June 30, 2014, there were no disagreements with Deloitte on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements if not resolved to the satisfaction of Deloitte would have caused it to make reference to the subject matter of the disagreements in connection with its audit report, nor were there any "reportable events" as such term is described in Item 304(a)(1)(v) of Regulation S-K, promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act").

On June 3, 2014, upon the recommendation of the Audit Committee, the Board approved the engagement of PricewaterhouseCoopers LLP ("PwC") to serve as the Fund's independent registered accounting firm to audit the Fund's financial statements for the fiscal year ending December 31, 2014 in the event that (i) Schroders was approved by the Fund's stockholders and commenced providing investment advisory services to the Fund and (ii) Deloitte was dismissed as the Fund's independent registered public accounting firm. Schroders commenced providing advisory services to the Fund on July 1, 2014 and Deloitte was dismissed as the Fund's independent registered public accounting firm effective the same date. As of July 1, 2014, PwC serves as the Fund's independent registered public accounting firm.

During the two most recent fiscal years and through June 30, 2014, neither the Fund nor any person on its behalf has consulted with PwC with respect to either (i) the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on the Fund's financial statements or (ii) any matter that was either the subject of a "disagreement" or a "reportable event" as such terms are described in Items 304(a)(1)(iv) or 304(a)(1)(v), respectively, of Regulation S-K promulgated under the Exchange Act.

Dividend Reinvestment Plan (Unaudited)

The Plan

The Fund's Dividend Reinvestment Plan (the "Plan") offers a convenient way for you to reinvest capital gains distributions and ordinary income dividends, payable in whole or in part in cash, in additional shares of the Fund.

Some of the Plan features are:

- Once you enroll in the Plan, all of your future distributions and dividends payable in whole or in part in cash will be automatically reinvested in Fund shares in accordance with the terms of the Plan.
- You will receive shares valued at the lower of the Fund's net asset value or the Fund's market price as described below. The entire amount of your distribution or dividend will be reinvested automatically in additional Fund shares. For any balance that is insufficient to purchase full shares of the Fund, your account will be credited with fractional shares.
- Your shares will be held in an account with the Plan agent. You will be sent regular statements for your records.
- You may terminate participation in the Plan at any time.

The following are answers to frequently asked questions about the Plan.

How do I enroll in the Plan?

If you are holding certificates for your shares, contact American Stock Transfer & Trust Company (AST) at the address shown below. If your shares are held in a brokerage account, contact your broker. Not all brokerage firms permit their clients to participate in dividend reinvestment plans such as the Plan and, even if your brokerage firm does permit participation, you may not be able to transfer your Plan shares to another

broker who does not permit participation. Your brokerage firm will be able to advise you about its policies.

How does the Plan work?

The cash portion of any dividends or distributions you receive, payable in whole or in part in cash, will be reinvested in shares of the Fund. The number of shares credited to your Plan account as a result of the reinvestment will depend upon the relationship between the Fund's market price and its net asset value per share on the record date of the distribution or dividend, as described below:

- If the net asset value is greater than the market price (the Fund is trading at a discount), AST, as Plan Agent, will buy Fund shares for your account on the open market on the New York Stock Exchange or elsewhere. Your dividends or distributions will be reinvested at the average price AST pays for those purchases.
- If the net asset value is equal to the market price (the Fund is trading at parity), the Fund will issue for your account new shares at net asset value.
- If the net asset value is less than but within 95% of the market price (the Fund is trading at a premium of less than 5%), the Fund will issue for your account new shares at net asset value.
- If the net asset value is less than 95% of the market price (the Fund is trading at a premium of 5% or more), the Fund will issue for your account new shares at 95% of the market price.

If AST begins to buy Fund shares for your account at a discount to net asset value but, during the course of the purchases, the Fund's market price increases to a level above the net asset value, AST will complete its purchases, even

Dividend Reinvestment Plan (Unaudited) (concluded)

though the result may be that the average price paid for the purchases exceeds net asset value.

The stock portion of any dividends or distributions you receive is not subject to the Plan. When the Fund declares dividends or distributions payable either in (i) stock or (ii) stock or cash at the election of the stockholder, you will receive newly issued shares of the Fund (unless you elect to receive your dividend or distribution in cash) on terms and conditions that are otherwise identical to those of the Plan.

Will the entire amount of my distribution or dividend be reinvested?

The entire amount of your distribution or dividend, payable in cash, will be reinvested in additional Fund shares. If a balance remains after the purchase of whole shares, your account will be credited with any fractional shares (rounded to three decimal places) necessary to complete the reinvestment.

How can I sell my shares?

You can sell any or all of the shares in your Plan account by contacting AST. AST charges \$15 for the transaction plus \$.10 per share for this service. You can also withdraw your shares from your Plan account and sell them through your broker.

Does participation in the Plan change the tax status of my distributions or dividends?

No. The distributions and dividends are paid in cash and their taxability is the same as if you received the cash. It is only after the payment of distributions and dividends that AST reinvests the cash for your account.

Can I get certificates for the shares in the Plan?

AST will issue certificates for whole shares upon your request. Certificates for fractional shares will not be issued.

Is there any charge to participate in the Plan?

There is no charge to participate in the Plan. You will, however, pay a pro rata share of brokerage commissions incurred with respect to AST's open market purchases of shares for your Plan account.

How can I discontinue my participation in the Plan?

Contact your broker or AST in writing. If your shares are in a Plan account, AST will send you a certificate for your whole shares and a check for any fractional shares.

Where can I direct my questions and correspondence?

Contact your broker, or contact AST as follows:

By mail:

American Stock Transfer & Trust
Company
PO Box 922
Wall Street Station
New York, NY 10269-0560

Through the Internet:

www.amstock.com

Through AST's automated voice response System:

1-888-556-0425

AST will furnish you with a copy of the Terms and Conditions of the Plan without charge.
